Ban Gueco

Gotham, Philippines | github.com/aybangueco | linkedin.com/in/example | aybangueco.vercel.app

Technical Skills

- **Programming Languages**: TypeScript, JavaScript, Go, Bash, HTML, CSS
- **Web Technologies**: React, Next.js, Sveltekit, Node.js, Express, Bun, Hono
- **DevOps & Tools**: Postman, Docker, Git, Github Actions

Experience

Nimble Labs Sep 2021 — Present

Full Stack Developer *Manila, Philippines*

- Designed and maintained full-stack web applications using React and Hono, serving internal and external clients.
- Built and integrated REST/GraphQL APIs for cross-service communication, improving data reliability and developer productivity.
- Reduced API response times by 40% through query optimization and edge caching with Bun.
- Collaborated with product and design teams to deliver responsive dashboards and analytics tools for customer operations.

AstraTech Solutions | Senior Software Engineer Sep 1999 — Aug 2021

React | TypeScript | Node.js *Manila, Philippines*

- Led migration from legacy systems to a modern TypeScript/Node.js backend, enabling quicker feature delivery and improved maintainability.
- Developed monitoring and telemetry tooling to surface application health and performance metrics in real time.
- Implemented CI/CD pipelines using GitHub Actions and Docker, reducing deployment time and rollback incidents.
- Mentored junior engineers and established code review and testing best practices across the engineering team.

Projects

FleetOps Manager Sep 2002 — Mar 2003

React | TypeScript | Node.js (github.com/aybangueco/fleetops)

- Architected a centralized platform for managing vehicle configurations, maintenance schedules, and upgrade histories.
- Built telemetry dashboards for diagnostics and real-time alerts, increasing uptime and lowering maintenance costs.
- Created RESTful APIs for logistics partners and internal tooling with robust authentication and role-based access.

CityWatch Incident Tracker Jan 2020 — Dec 2020

Next.js | Go | PostgreSQL (github.com/aybangueco/citywatch)

- Developed an incident reporting and response coordination system for municipal operations.
- Implemented analytics dashboards to track response times, incident trends, and resource allocation.
- Deployed production workloads via Docker and GitHub Actions, improving release safety and observability.

Education

Metropolitan University Manila, Philippines

Bachelor of Science in Computer Science Sep 2021 — Jul 2025
